ARKOIL Technologies Nederland B.V
Abu Dhabi Branch

Subject: Abu Dhabi Refinery Closure Project No. 35001-00053 - Soil Remediation and Land Reclamation (Package III).

This is to certify that **ARKOIL Technologies Nederland B.V.** has successfully executed works for ADNOC Refining under the **Abu Dhabi Refinery Closure Project No. 35001-00053 – Soil Remediation and Land Reclamation (Package III).**

The scope of work carried out by ARKOIL included:

- Comprehensive site investigation covering an area of 200 hectares.
- Excavation, removal, and ex-situ bio-remediation of approximately 550,000 cubic meters of hydrocarbon-contaminated soil.
- In-situ biological and chemical treatment of various contaminated soil profiles.
- Biological treatment of groundwater contaminated with LNAPL and hydrocarbon-impacted groundwater.
- Excavation and backfilling of soil.
- Preparation of 40 hectares for bioremediation operations under ex-situ processes.

Throughout the project, ARKOIL has demonstrated excellent technical capabilities, effective project management, and a proactive approach in aligning with ADNOC Refining's operational and HSE standards. The project was delivered to our satisfaction while maintaining over 400,000 man-hours without any Lost Time Incidents (LTI), reflecting ARKOIL's commitment to safety and quality.

Based on their performance, ADNOC Refining considers ARKOIL Technologies Nederland B.V. a reliable and competent contractor for soil remediation and environmental projects, and we would have no hesitation in considering them for future assignments of a similar nature.

Best regards,
